**Moor Fast®
mooring aid
61118**

Moor Fast® is a ready-to-use mooring system. It helps threading a rope through a buoy ring or marina cleat up to 2 meters away from the safety of your deck, easily bringing it back on board. The unique Moor Fast® claw even scoop up rings and shackles that lie flat thus uneasy to reach. Manufactured from high-tech materials and built to last in a marine environment, the Moor Fast® design has been carefully researched and tested by boat owners.

The Moor Fast® head has a lifetime guarantee against breakage in normal mooring use. Supplied without pole, it fits any Swobbit® pole (see the Maintenance chapter).
