

BREATHABLE SARDINIA JACKET - SB0100
RED, BLACK, NAVY, PLATINUM, SURF

BREATHABLE

This popular collection is ideal for casual wear and light day-sailing. Garments are constructed from a lightweight waterproof and breathable fabric which will keep out rain and spray yet allow moisture vapour to pass outwards. Jackets and trousers have taped seams to keep you completely dry. Try the mesh-lined Sardinia in warmer climates or the fleece-lined Corsica in cooler temperatures.

BREATHABLE TECHNOLOGY

BENEFITS

- Waterproof
- Windproof
- Breathable
- Lightweight

CONSTRUCTION

2-layer polyamide ripstop fabric with hydrophilic coating
Seam tape ensures jackets & trousers are 100% waterproof
Sardinia garments have a polyester breathable mesh lining
Corsica garments have Arc'tec®(6) fleece lining

INNOVATION

DWR (Durable Water Repellent) finishing treatments are applied to all garments to encourage water to bead and run-off. This reduces the chance of a garment water (wetting out) and also affecting the garment's breathability.
